City \_\_\_\_\_ State \_\_\_\_\_ Zip \_\_\_\_\_  
Phone \_\_\_\_\_ E-mail \_\_\_\_\_

\_\_\_\_\_ CLM Training - \$50 (Payable to: ODA, LEPP)

\_\_\_\_\_ Compost Certification Class - \$10 (Payable to: OSU Extension)

## Purpose

Manure from large livestock and poultry farms can be an asset when handled and recycled properly as a fertilizer. It can also be the largest liability for a farm if handled incorrectly. The Ohio Department of Agriculture is sponsoring a Certified Livestock Manager Training Session for any farmer or custom applicator who needs to get licensed by ODA or who wants to learn more about best management practices concerning manure management.

This two-day training session will provide nutrient management training, manure storage and handling training, emergency management planning, insect and rodent control practices, and a review of the rule and regulations concerning manure handling. This training session enables participants to complete all the training needed for initial certification. Certified Livestock Managers will need 10 hours of continuing education every three years to maintain certification.

## Who should attend?

- Anyone who manages and/or handles manure at a major concentrated animal feeding facility
- Anyone who buys, sells, or land applies more than 4,500 dry tons or equivalent\* of manure a year
- Anyone who buys, sells, or land applies less manure who wants to learn more about best management practices

\* *to determine equivalent, take the weight of manure applied multiplied by the percent dry matter content.*

## Certification Requirements

To receive Certified Livestock Manager licensing through ODA, a farmer or custom applicator must attend three “core” training sessions and three “elective” sessions, complete the Certified Livestock Manager application, and submit a \$30 application fee payable to: Ohio Department of Agriculture. For more information, visit our website at:

<http://www.ohioagriculture.gov/pubs/divs/lepp/lepp-licensing.stm>

Core and elective sessions can also be found through the Livestock Environmental Assurance Program (LEAP) Level I, Level II, and the Manure Management Issues, Challenges and Solutions Training administered by the Ohio Livestock Coalition; the Ohio Composting and Manure Management Lecture Series (OARDC); the Manure Management Seminars (OARDC); the Manure Science Review (OARDC); the Certified Crop Advisor Training; the OSU Extension Livestock Mortality Training; and any other local Manure Management and Application Training.

### Core training sessions

- Environmental Rules and Regulations
- On-Farm Nutrient Balance
- Manure Storage and Handling

### Elective training sessions

- Role of animal Agriculture Environmental Awareness
- Odor Awareness and Control
- Mortality Management
- Emergency Action Plans
- Insect and Rodent Control
- Human Health Risks Associated with Animal Agriculture
- Good Neighbor Relations
- Biosecurity

## Meeting Location

Auglaize County Administration Building  
209 S. Blackhoff St.  
Wapakoneta, OH 45895
